Call for abstracts & papers

ESREL 2025 is the 35th ESREL conference under the auspices of the European Safety and Reliability Association (ESRA) (https://esra.website/). The conference dates back to 1989 and has taken place under the ESREL name since 1992. SRA-E 2025 is the 33rd annual SRA-E conference (https://www.sraeurope.eu/).

Welcome - Scope of the conference

Join us at the Stavanger 2025 conference where we will bring the European Safety and Reliability (ESREL) and Society for Risk Analysis Europe (SRA-E) conferences together under one roof at the University of Stavanger, Norway. The scope of the conference is broad, covering all types of topics within risk, safety, security, reliability, resilience, vulnerability and sustainability assessment, perception, communication, management and governance, both theory and application. This year's theme: "Advancing risk, safety and reliability sciences, with applications – from component, to system, to society" highlights the need for enhanced knowledge within each field, as well as the importance of broadening the perspective and crossing the boundaries of traditional disciplines and research areas.

Conference venue

The conference will be held at the University of Stavanger in Norway. Stavanger is Norway's energy capital and one of the oldest cities in the country; it will celebrate the 900th anniversary in 2025. The city has both smalltown charm and the facilities of a modern international city. Stavanger is located on the south-western coast of Norway close by the sea and just as close to the fjords, forests and mountains.
